

## Biomedical iNet Launch Events

Tuesday 18 January - Leigh Court, Bristol

Thursday 20 January - Castledown, Wiltshire

Thursday 27 January - Tamar Science Park, Plymouth

### Biomedical iNet

The South West Biomedical iNet will provide free advice and find consultancy and technical support, enabling exploitation of innovation, particularly in new and existing companies.

The iNet will run a three-year programme to **accelerate** the development of innovation, to **translate** innovation from universities and the NHS into industry and to aid **internationalisation** of innovation through working with organisations such as UKTI and EEN.

### Launch events

The launch road shows will not only give you an opportunity to network with other organisations but also you will have a chance to meet with our Expert Review Panel who will consider novel ideas presented by delegates and assess what support could be given by the iNet to aid exploitation of these innovative ideas. The iNet will be funding specialist support to help businesses bring innovation to market. There will also be the opportunity to meet with the consortium partners who represent a broad range of expertise across the sector.

### Programme

**09:30** Registration and refreshments

**10:00** Keynote speaker:  
Dr Jim Murray
